ISSUE: APRIL 2023

Hi Everyone,

Our dental promotion has been a great success. As dental disease is present in 75% of our patients over 7 years of age, it isn't a surprise that we have been busy. We have had some animals that have just needed a couple of extractions and a scale and polish, and then others who have needed over 15 teeth extracted due to severe periodontal disease!

As we are very passionate about your pet's dental health, we offer free of charge dental checks. If you can smell your pet's breath or you have noticed that they are not eating as much as normal, rubbing their face, or walking away from their food, then please call us for a free of charge dental check where one of our team can assess your pet's mouth and help advise you about dental care for your pet.

We have a few new members of staff that have started this month. Helen, our Animal Care Assistant, and Laura, who is a Registered Veterinary Nurse. Both have fitted into the Coquet Vets team perfectly and are helping us to give a great service to our growing client and patient base.

A reminder that we offer the Coquet Pet Club for dogs, cats and rabbits. The Coquet Pet Club offers your pet preventative treatments and services, all at discounted prices for a monthly direct debit fee! Please note it will be 4 weeks from the date you sign up to our Coquet Pet Club before you can receive any treatment. For more information and terms and conditions please visit our page at www.coquetvets.co.uk/coquet-pet-club

Next month is Veterinary Nurse Awareness Month. We will be introducing you to our amazing nursing team. Don't forget we have promotions and weekly articles on our Facebook page, so like and follow us to make sure you don't miss anything.

Finally, please remember we have bank holidays coming up, so email us in advance at prescriptions@coquetvets.co.uk for your pet's repeat medications.

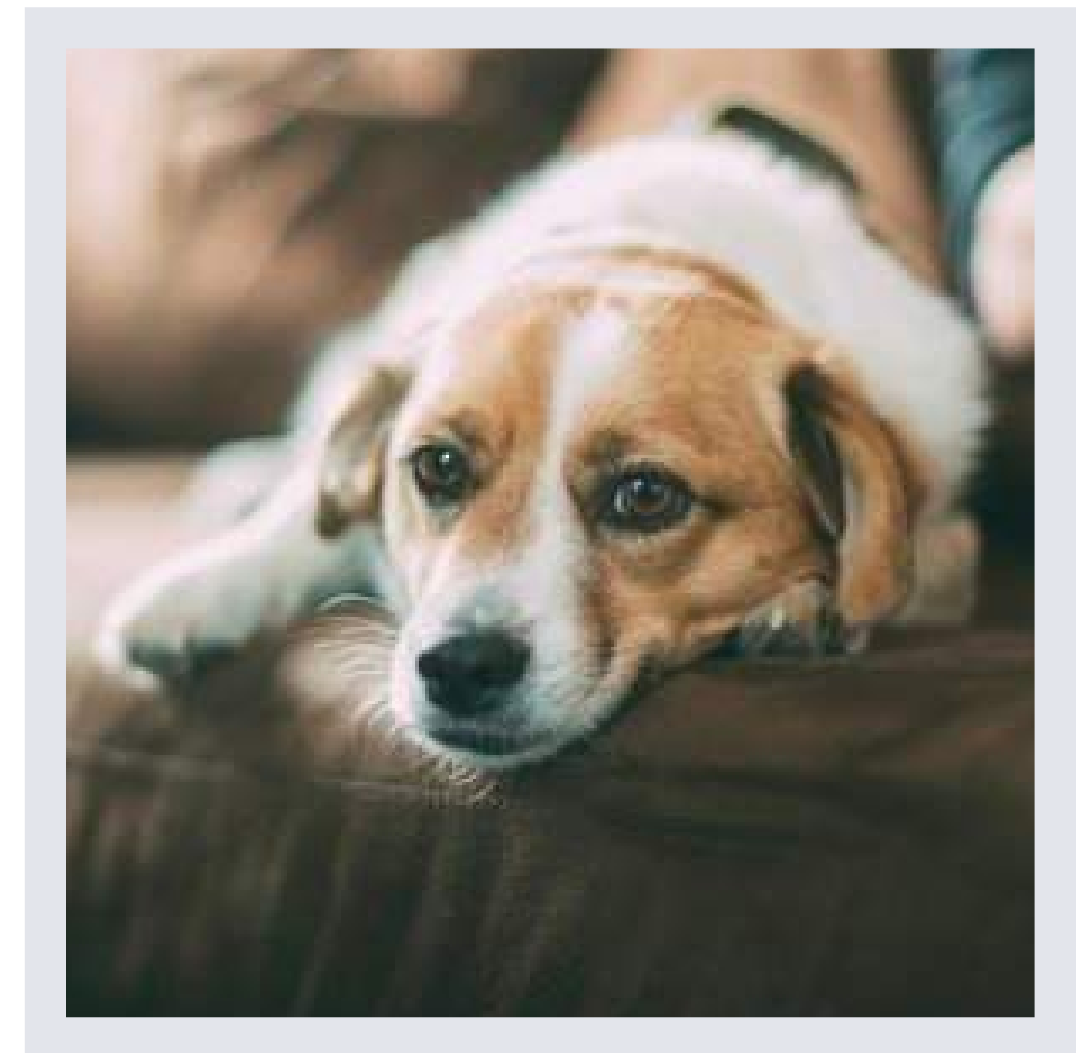

We hope you enjoy reading our latest articles and news from the team, and we look forward to seeing you at your next visit.

The Coquet Vets Team

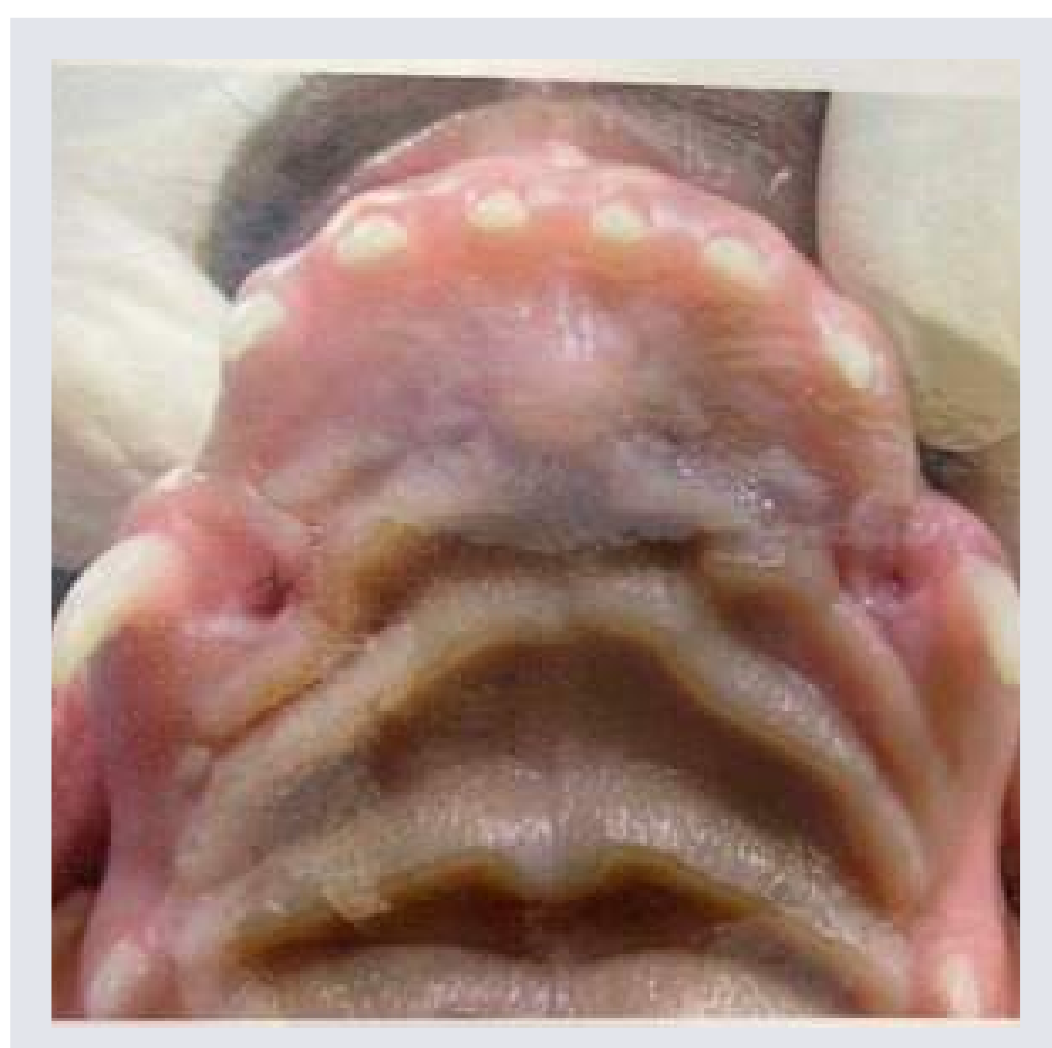

SHOULD MY PET HAVE A PRE-ANAESTHESIA BLOOD TEST?

If your pet is requiring an anaesthetic, we sometimes recommend that a blood test is performed on the morning of a procedure. In this article, we discuss why a pre-anaesthesia blood test might be important for your pet.

LINGUALLY DISPLACED CANINES

Lingually Displaced Deciduous Canines (LDDC) is a genetic condition where a dog's lower deciduous canines (baby teeth) are growing into the hard palate (top of the mouth). The teeth are growing too far towards the tongue (lingually).

WHAT IS PARVO?

Parvo in puppies is caused by the canine parvovirus. This virus is highly contagious and spreads through direct contact with an infected dog or by indirect contact with a contaminated object.

TEAM UPDATE: MEET LAURA & HELEN!

This month, we welcomed two new members to our Coquet Vets team!

Laura Melrose joined us as a Registered Veterinary Nurse and has come to us from a primary care practice in Newcastle. Laura qualified as a Registered Veterinary Nurse in April 2019 and has a keen interest in veterinary anaesthetics and radiography.

Helen Elliott also joined us this month as an Animal Care Assistant. Helen is our first Animal Care Assistant and has always wanted to be in veterinary care. Whilst growing up, she had dogs, cats, hamsters and tortoises!

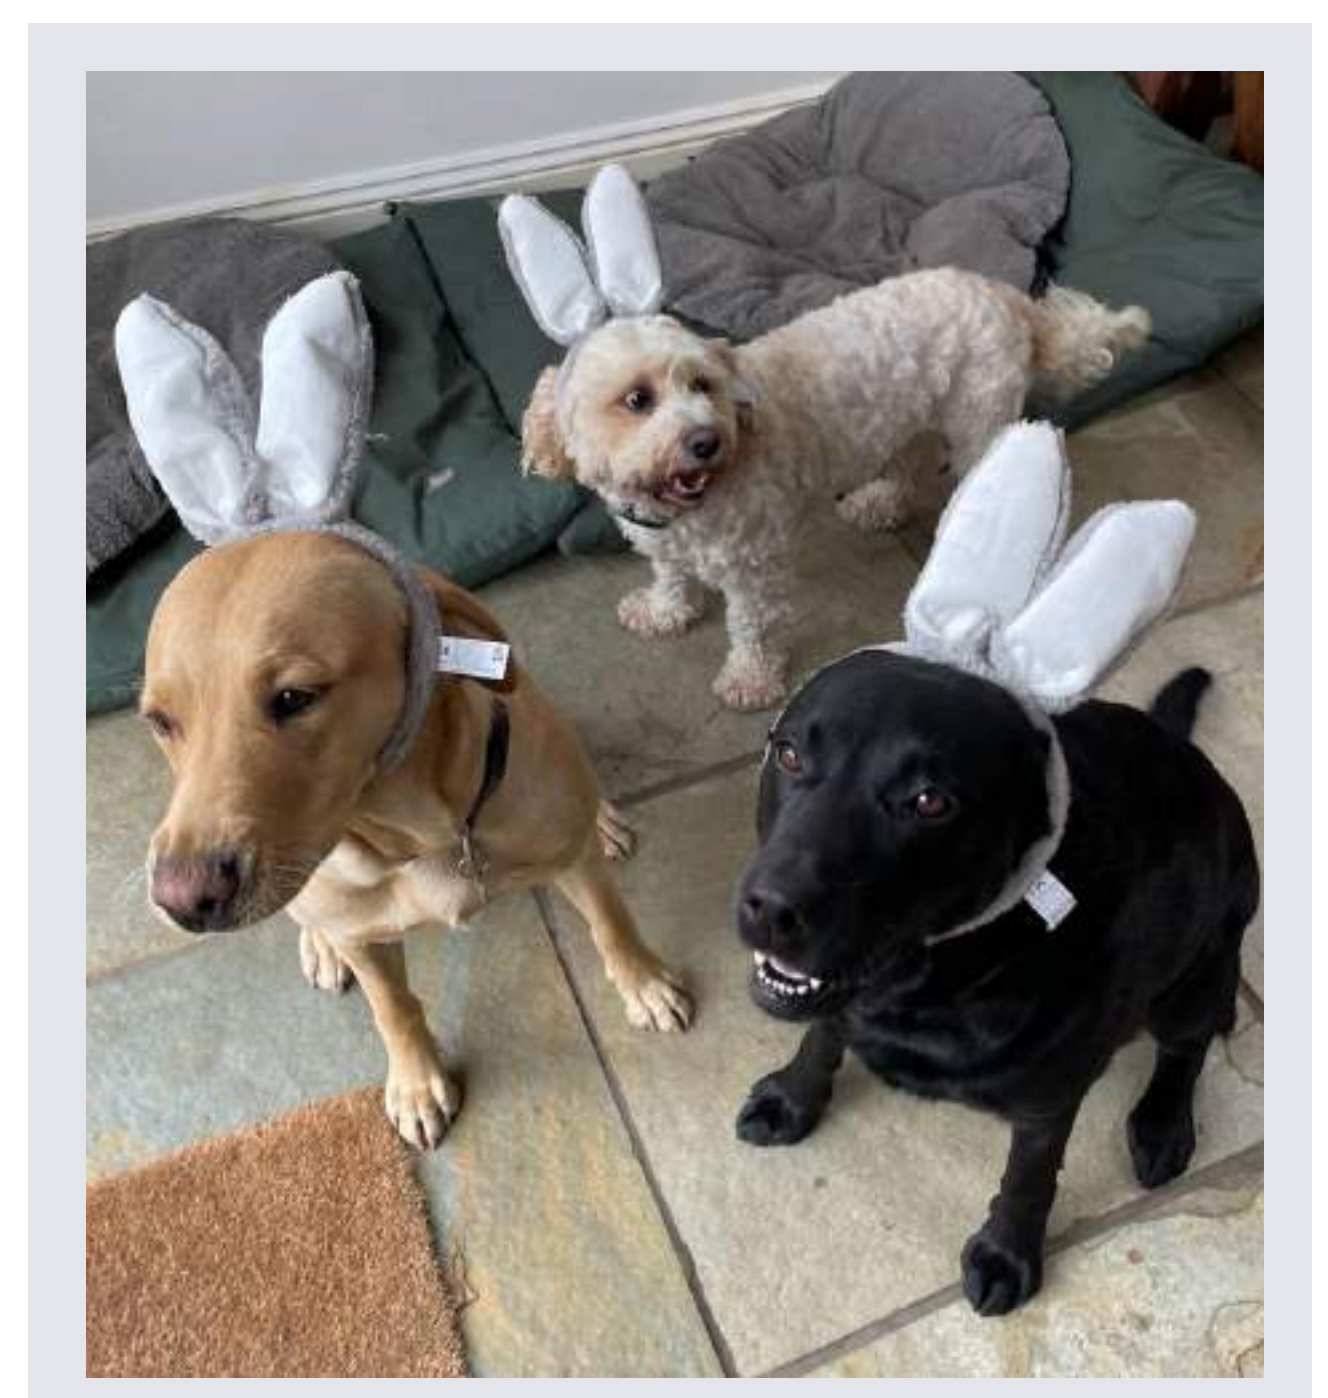

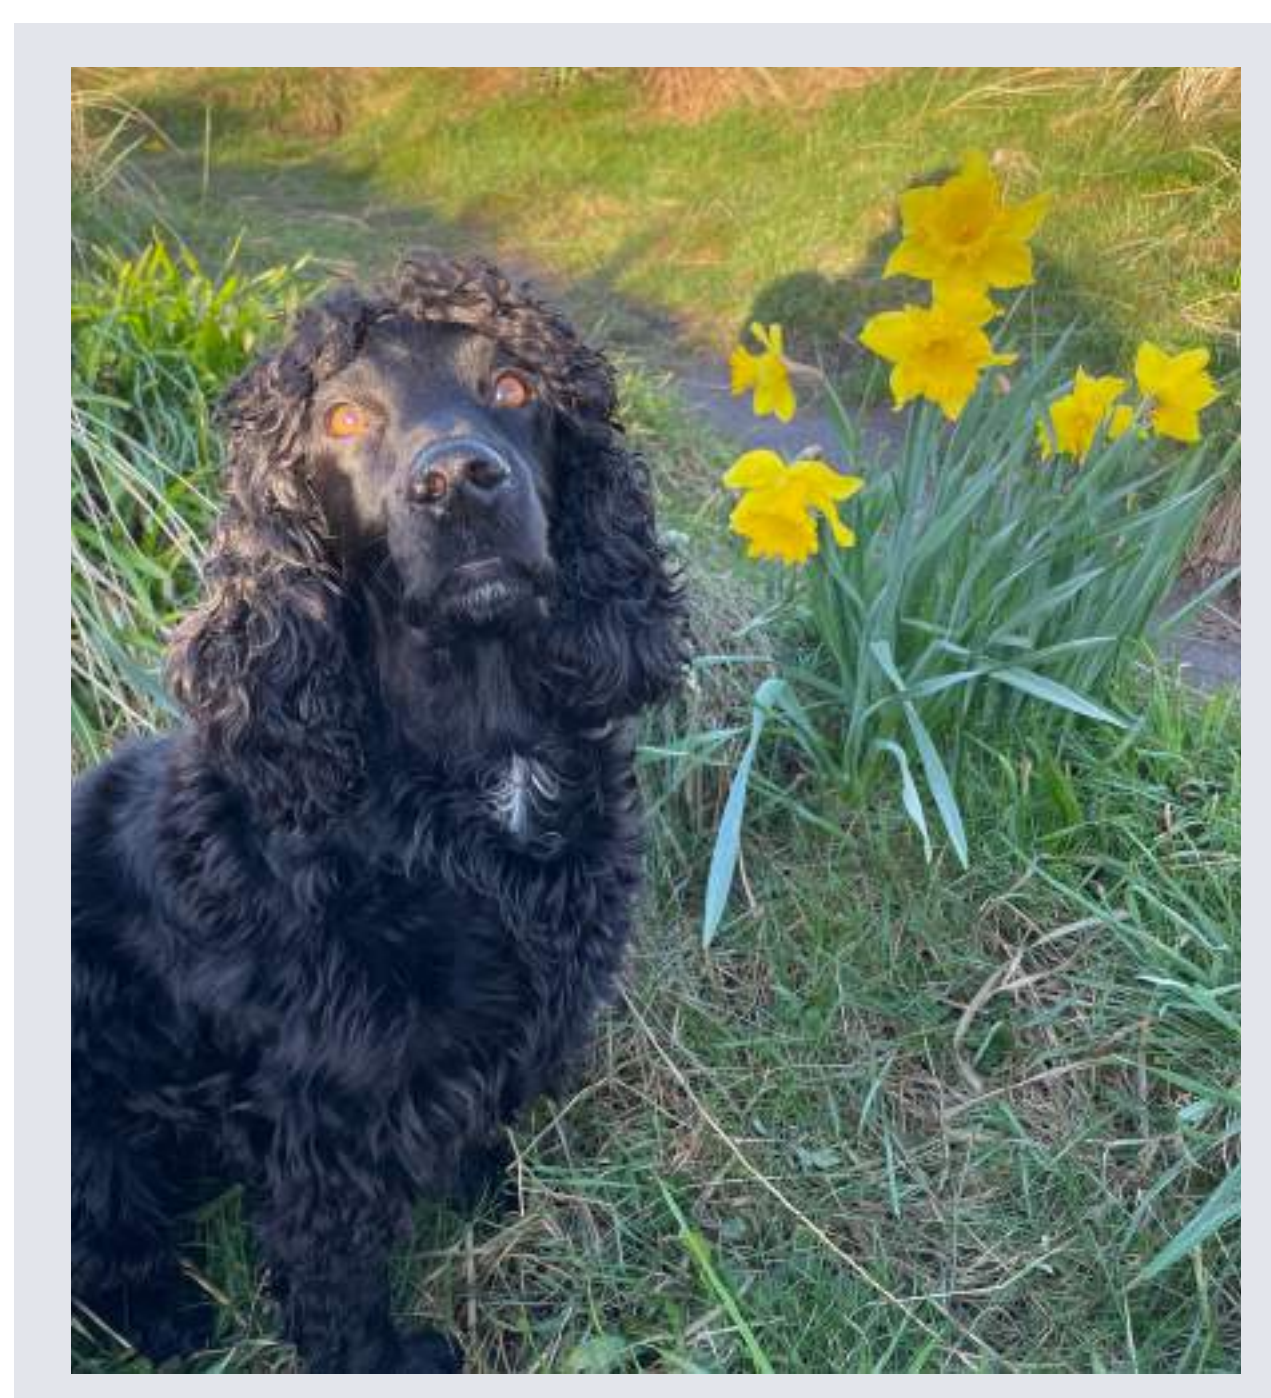

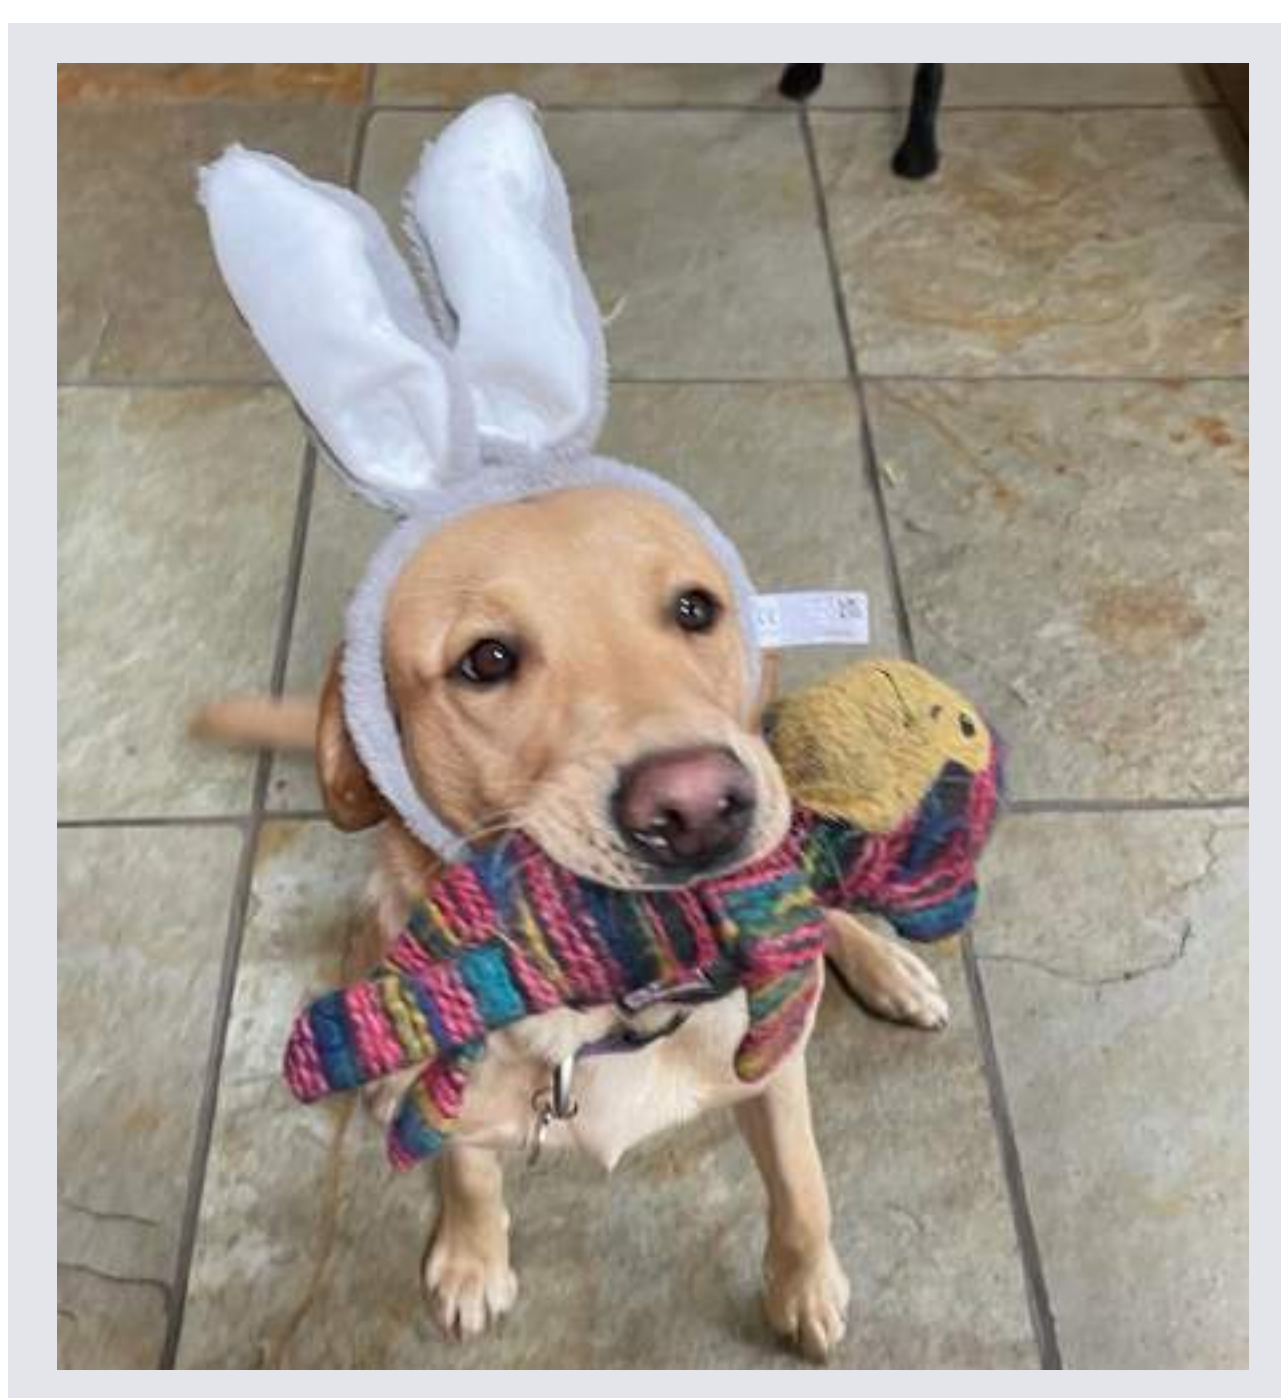

Find out more about Laura and Helen on our Team page.
