ISSUE 15 - JULY 2021

Hi Everyone,

July has been a busy one here at Coquet Vets. Due to the summer season, we have seen an increase in pets with allergic skin disease, ear disease, and ones that are struggling in the heat. We have also had a number of wildlife cases, which we have dealt with. These have included hedgehogs, wild birds, and a weasel. Not all were success stories, but it always leaves the team with smiles on their faces when we are able to release them back into the wild.

We have also had dental month this month and we have treated many cats and dogs teeth. We aim to encourage our clients to inspect their animal's teeth and, where possible, do some dental care at home. The dental promotion has meant that many of our clients that booked in needed treatment for their pets, and as a result, we now have lots of gleaming smiles. Don't forget you can book free of charge dental checks for your pet with our vets or nurses.

As we progress through the summer months, remember to be sensible about how and when you exercise your dogs. Heat stroke is a potential killer and prevention is better than cure.

A final mention is a welcome to our newest staff pet, Rhum, a wire haired Hungarian vizsla. He's an absolute beaut and is fitting in nicely to the team.

We hope you enjoy the collection of articles in this month's newsletter, and make sure that you follow our Facebook page for regular updates and promotions.

Stay safe, and we look forward to seeing you soon.

The Coquet Vets Team

FLYSTRIKE IN RABBITS

Flystrike is a horrible disease that affects rabbits and is often fatal, due to infection or from toxic shock. We look at how flystrike occurs and how to prevent it from happening so your rabbit stays happy and healthy.

LINGUALLY DISPLACED DECIDUOUS CANINES

Lingually Displaced Deciduous Canines (LDDC) is a genetic condition where a dog's lower deciduous canines are growing into the hard palate. The teeth are growing too far towards the tongue. We take a look at the symptoms and treatment options.

DENTAL CASE STUDY: RESORPTIVE LESIONS

Resorptive lesions are not always visible to the naked eye due to them starting below the gum line. Here's a dental case study on the symptoms, diagnosis and treatment for our feline patient, Sox.

NEW MONTHLY EVENTS: COQUET VETS PUPPY PARTIES

We are excited to announce that we are going to be holding puppy parties every second Tuesday of the month at 6pm. Our first one started on Tuesday 27th July. The next party is Tuesday 10th August.

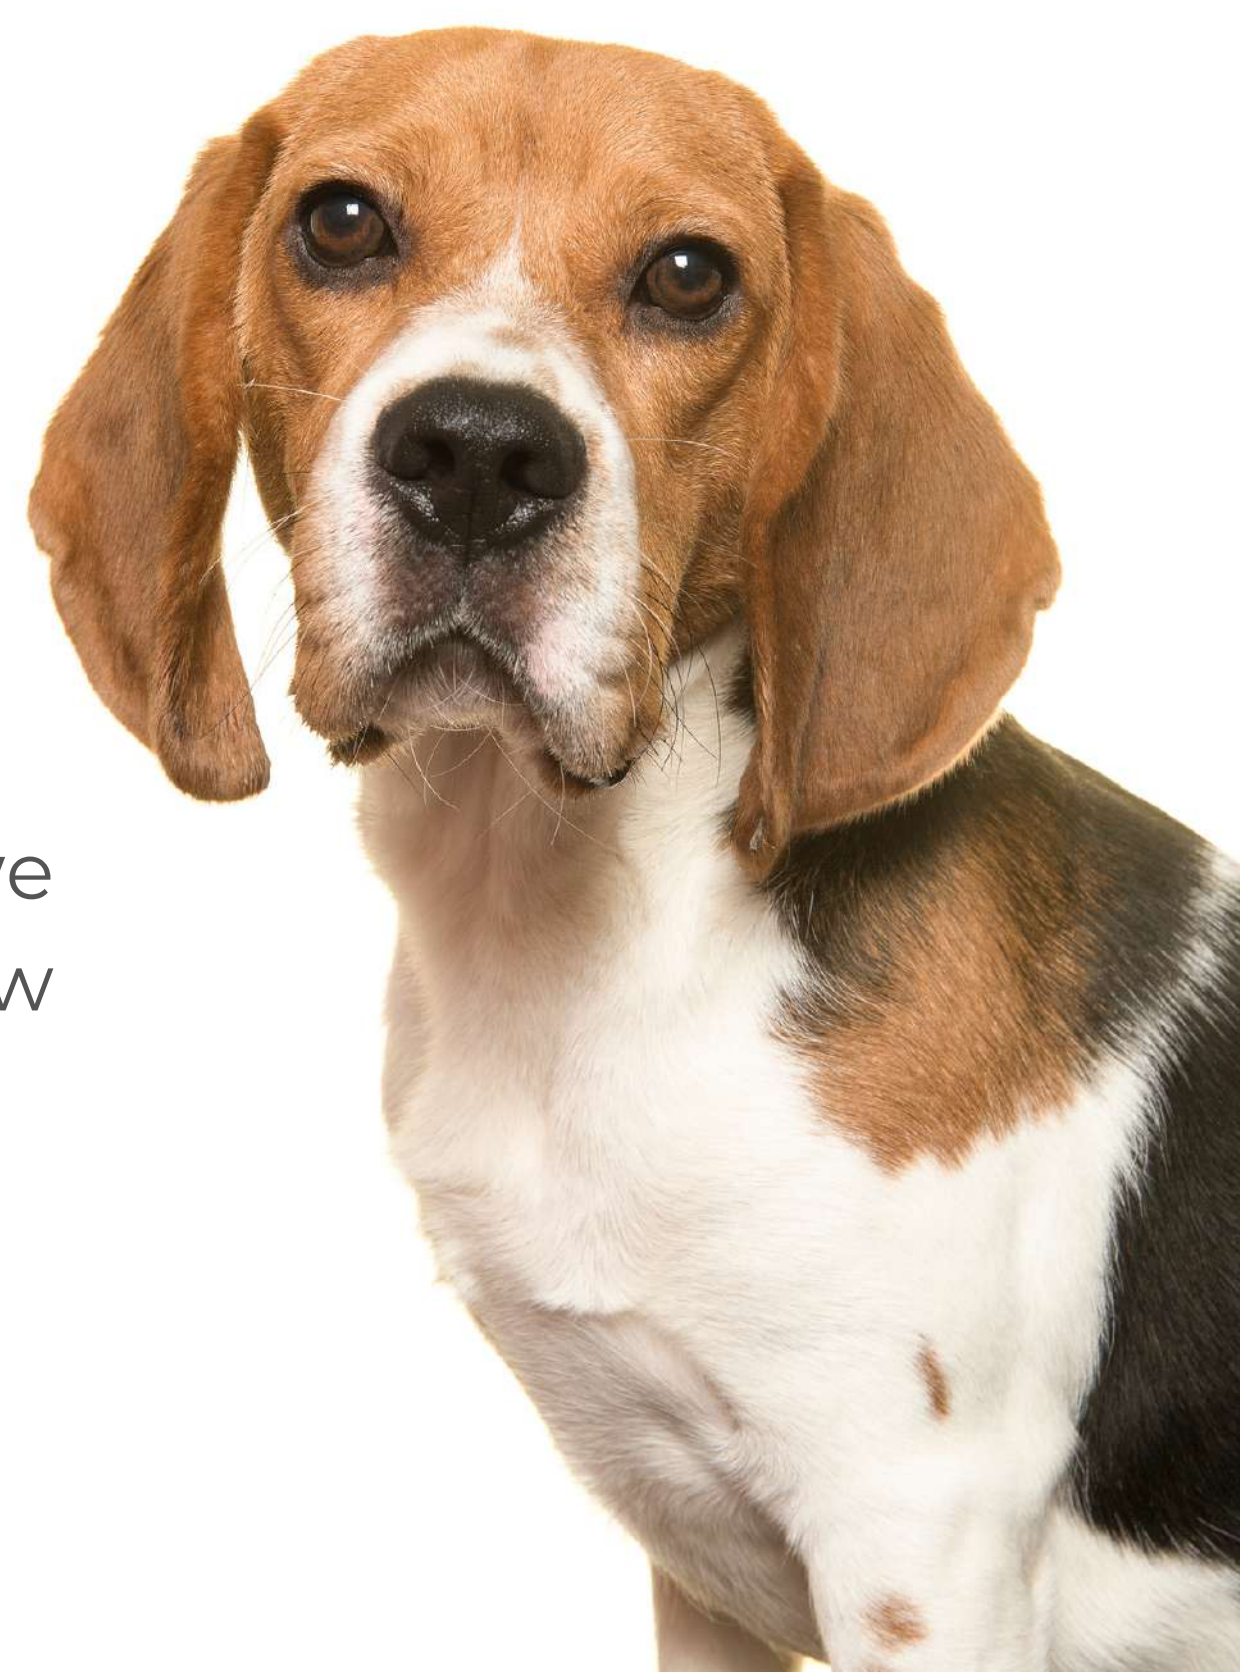

We are allowed a maximum of 6 puppies and only 2 people per animal. The puppy has to have their first vaccination and must not have been outside. Each puppy will get a free bag of Hill's food and some goodies for attending.

If you are interested and would like to get booked in, please call us on 01665 252 250.

PROMOTION: 5 WEEKS FREE PET INSURANCE - VETSURE

If your pet is aged over 16 weeks and under 10 years, and your pet is not yet insured, we can offer you five weeks FREE pet insurance with Vetsure. Please click on the link below and fill in the correct details to get your pet covered today.
