

Monthly Newsletter

ISSUE: JANUARY 2024

Hi Everyone,

How are we coming to the end of January 2024 already! We are pleased to say that our new vet, Gemma, has settled in at Coquet Vets. Gemma has a certificate in small animal surgery with a keen interest in orthopaedics and soft tissue surgery, and she is already a vital part of the team.

In other news, we are always keeping up to date with new veterinary technology. We have just invested in a lab machine that can test in house giardia and worms in a faecal sample. We will be sharing more on this in a new article from our vet team soon. This new machine means we will have the potential for more same day results, which allows prompt treatment if required.

We have a few promotions and events booked in for this year. February is pet dental month with up to 15% off, and March will be our neutering month with up to 15% off (dogs and cats only). We also have our third client first aid evening on Thursday 28th March where one of our vets will be doing a talk on 'First Aid and Poisons' at 6pm. It's £15 to attend, which includes a small first aid kit. We would like as many clients as possibly to attend, so give us a call and get booked in.

We hope you enjoy our latest newsletter.

The Coquet Vets Team

CASE STUDY: DAMIAN – RTA CASE

This case study is about a cat called Damian who was in a road traffic accident (RTA). We look at how he was assessed and treated for his injuries.

ANTIFREEZE POISONING IN CATS

During the winter months, it's important to be aware of the dangers of antifreeze to your cat. Unfortunately, cats are attracted to antifreeze and it is highly poisonous for them. In this article from our 2020 news archive, we shared the signs of ingestion and how to protect your cat.
