## ISSUE 14 - MAY 2021

Hi Everyone,

We hope you are all starting to enjoy a little bit of normality - we are certainly enjoying meeting more and more of you.

This month we have passed a big milestone by registering our thousandth patient. With new registrations every day, we really feel that Coquet Vets is starting to make a difference to animals and clients alike in the Amble and surrounding areas.

We would also like to welcome our new veterinary receptionist, Catherine. Catherine joined us this month and has settled in brilliantly. It feels like a real luxury to have our very own receptionist - please make her feel welcome. At Coquet we felt it was only fair to make her do one of our TicTok dances, so make sure you check it out on our [Facebook page](#).

We are also pleased to announce we are now working with Mo Poole who is a member of the Canine Massage Guild and is a trained massage practitioner. Canine massage can be used in so many different cases so please take a read of our latest article to learn more. These sessions can be booked by contacting us on **01665 252 250**.

We had a positive response to our April case study on an adder bite, which many of you seemed to find interesting and very useful too. So, this month, we have another case study for you to read - Bella and her orthopaedic surgery. We are pleased to report that she is doing very well and is gradually getting back to normal.

This month's vaccination promotion has been extremely successful, and we have seen many animals get back on track with their vaccinations. Don't forget to keep your pets' vaccinations up to date. If they have lapsed it is very easy to restart them. Your pet will get a full health check too.

Finally, May 31st to June 6th is National Garden Wildlife Week. We will be sharing some fun facts and plenty of ideas to help garden wildlife on our Facebook page. Look out for some special wildlife articles over June, that we hope you will all enjoy.

Stay safe, and we look forward to seeing you soon,

*The Coquet Vets Team*

## CASE STUDY: LUXATING PATELLA SURGERY

Bella, a 10-month-old Cavalier cross, started holding up her left hind leg for a few seconds when she was walking, and then placing it back down. This had been going on for a few days and our vet discovered it was a luxating patella. Find out more with this short case study on the diagnosis, treatment, and after care for a luxating patella.
